

UNIVERSITY PROJECT PRESENTATION

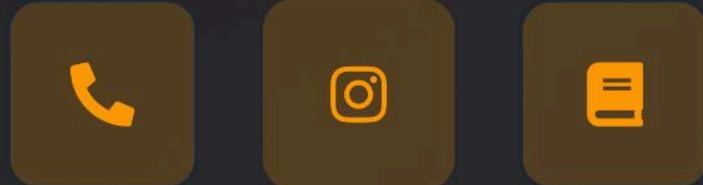

BIZ BOOK

Online Booking System for Barbershops

Created by Nuskaiym Sabitalieva

The Problem

Many barbershops still use phone calls, Instagram messages, or notebooks for booking.

This causes:

- ✗ Missed appointments
- ! Human errors
- ☹ Inconvenience for clients & barbers

Why It Matters

For Clients

Clients cannot see **available time slots**.

Leading to frustration and friction in the booking journey.

For Barbers & Business

Time Inefficiency

Barbers spend too much time managing bookings manually.

Lack of Insight

There is no clear schedule or statistics to track growth.

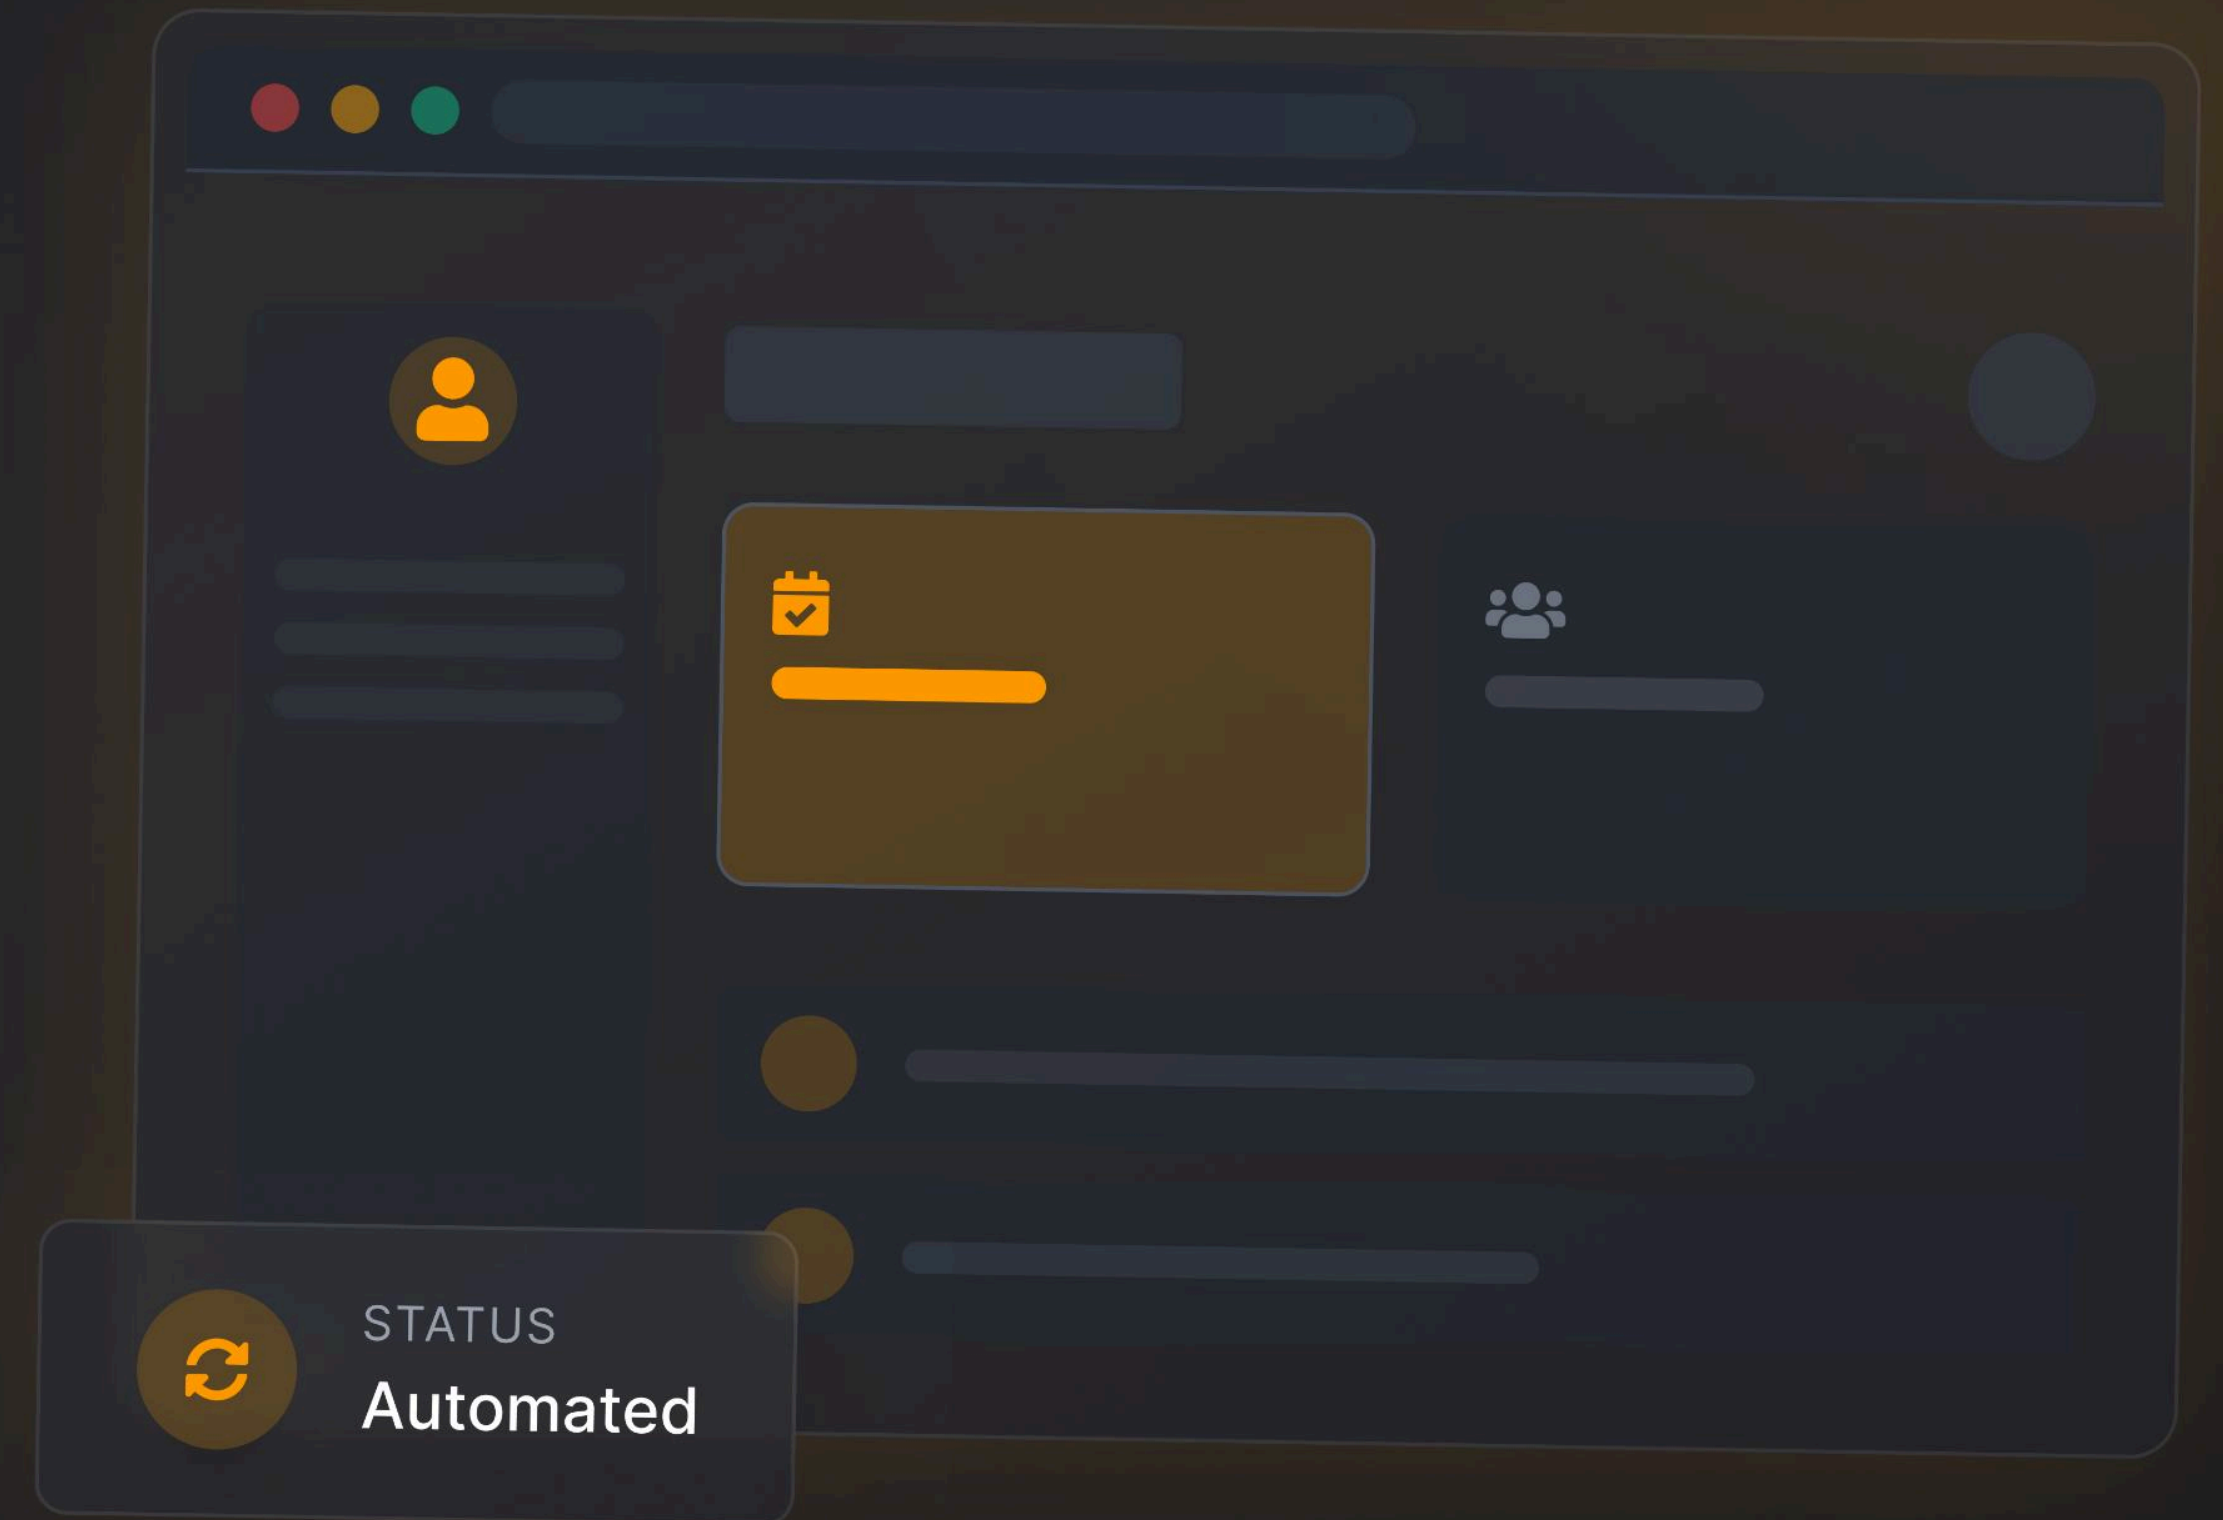

The Solution

BizBook

- BizBook is a **web application** designed to simplify and automate the barbershop booking process.
- It creates a seamless ecosystem that allows **clients** to book services instantly online while empowering **barbers** to efficiently manage their entire business operations.

✓ 24/7 Availability

✓ Cloud-based

How Client Booking Works

1

Choose Method

Select between booking a specific service or choosing a preferred master.

2

Select Service & Master

Customize the appointment by picking the exact service and professional.

3

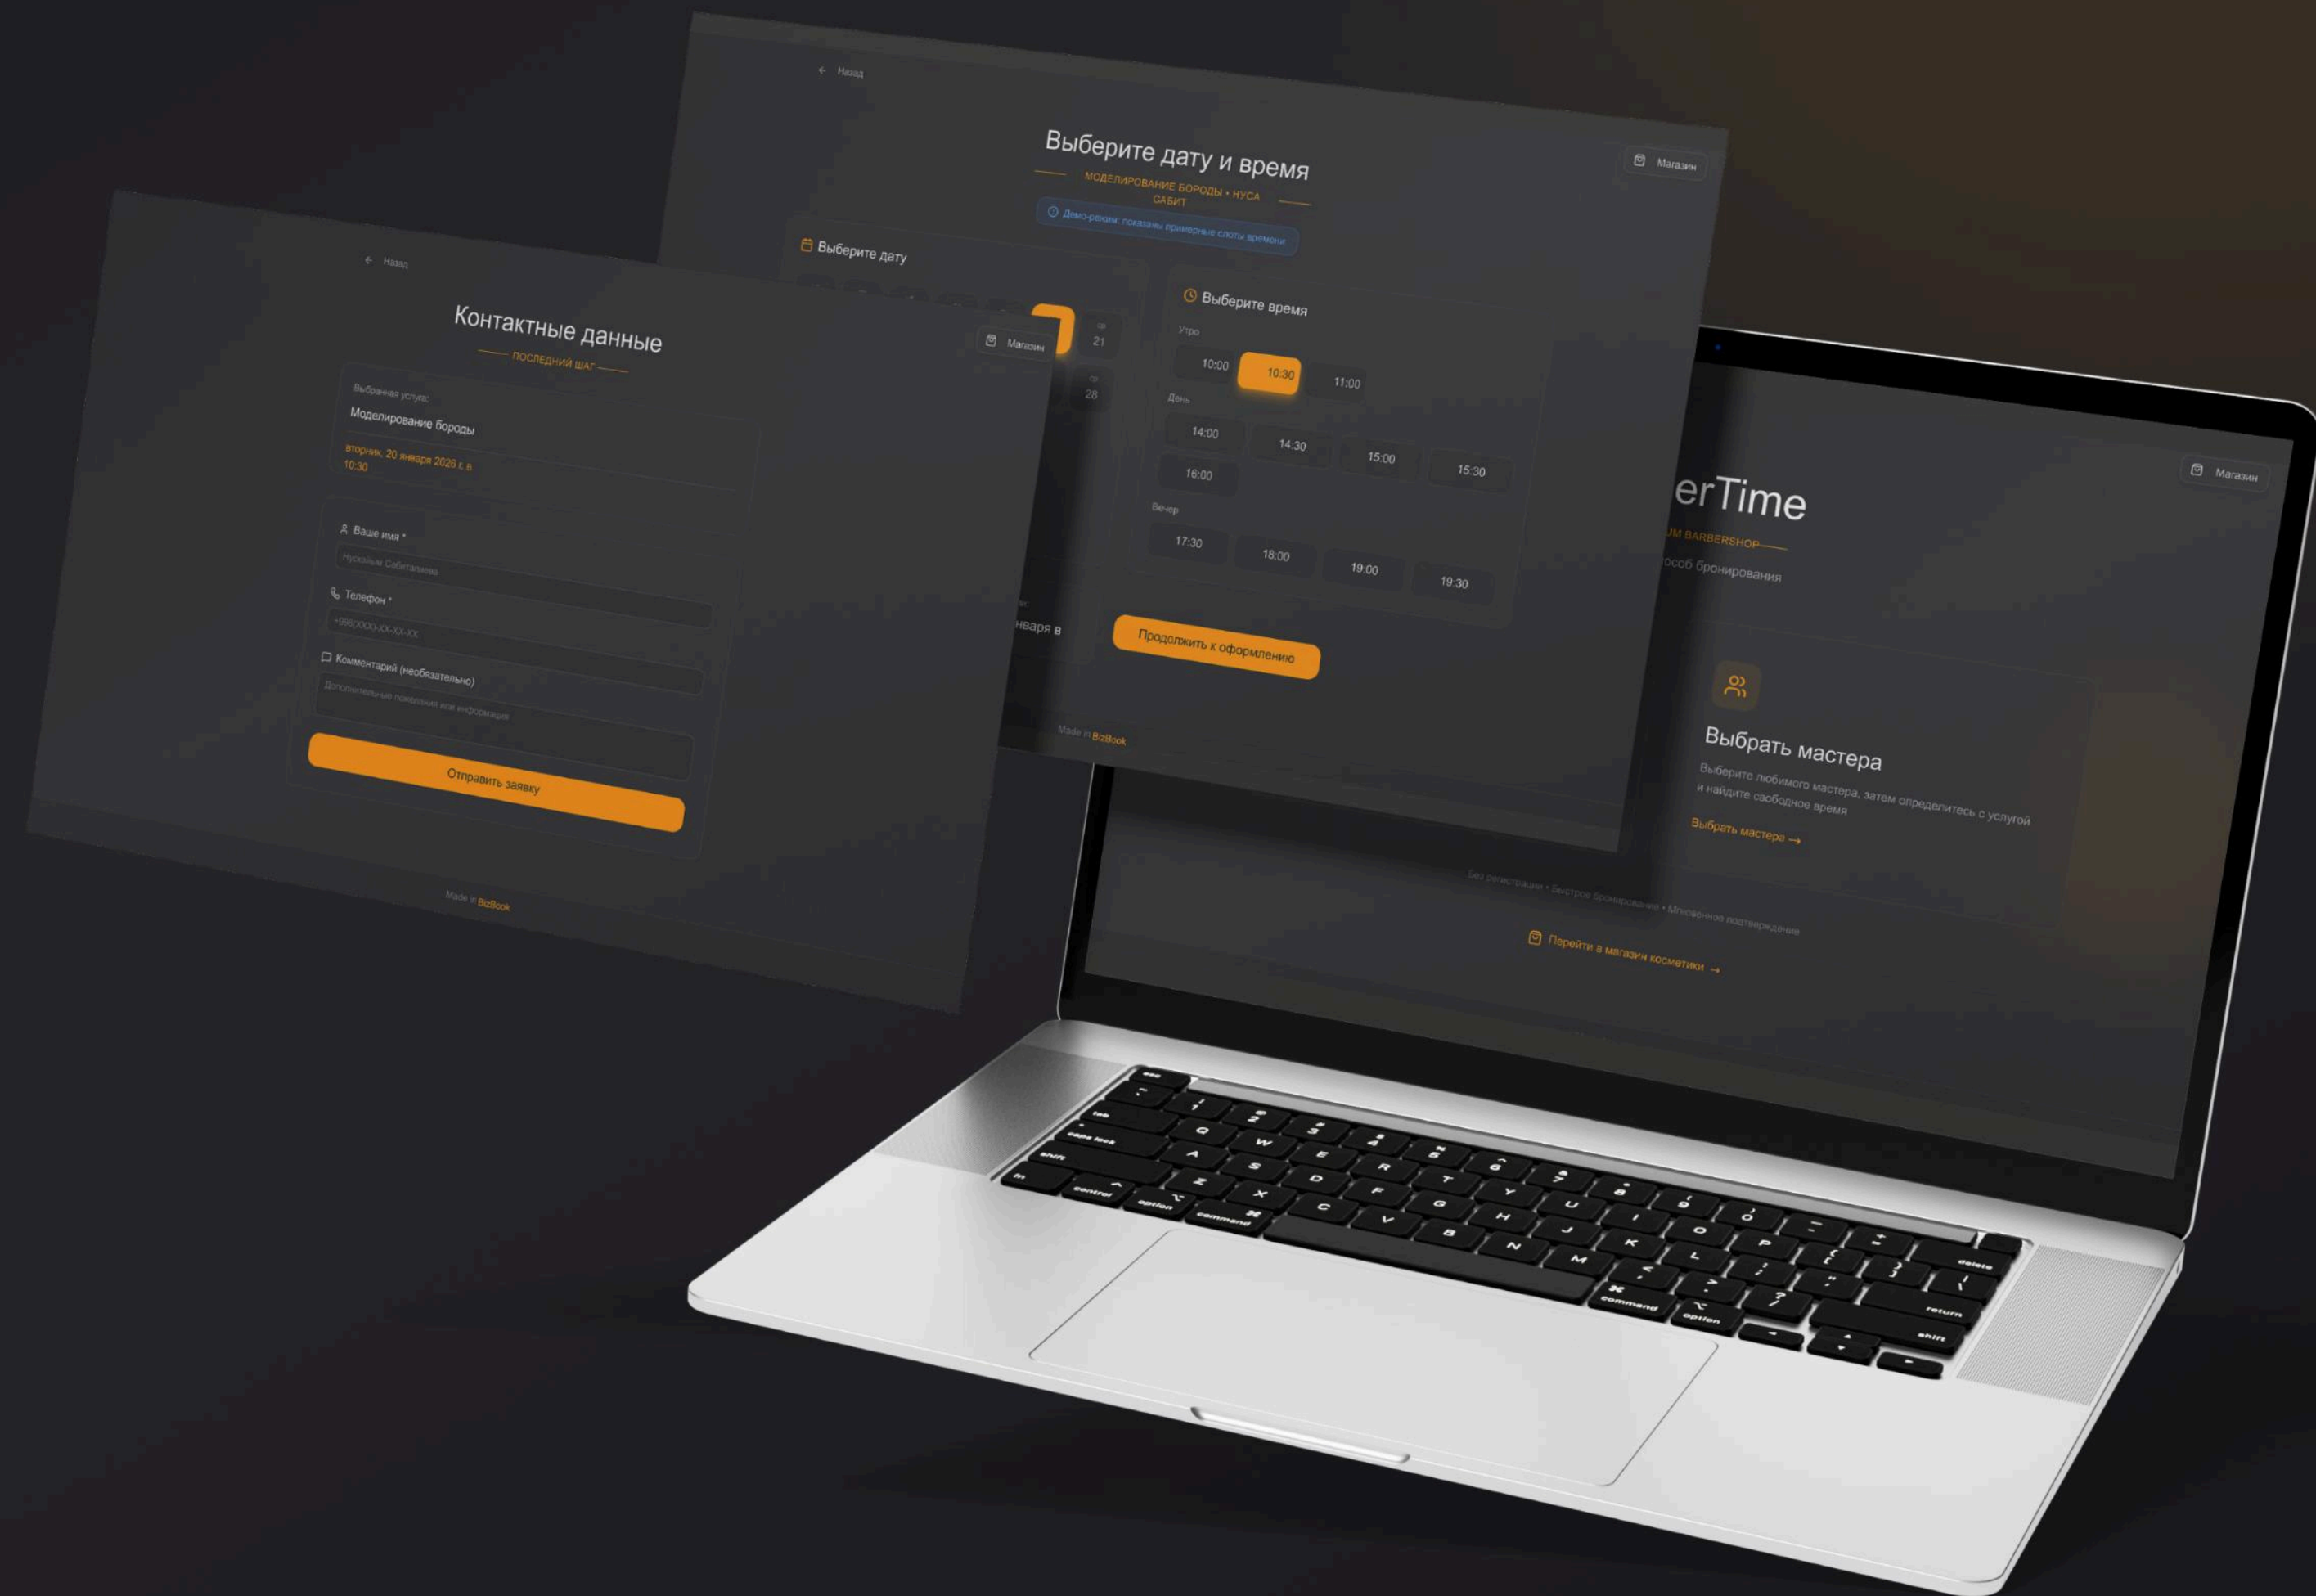

Choose Date & Time

View real-time availability and select a convenient slot.

4

Confirm Details

Enter contact information and send the booking request instantly.

Services Selection

Clients can instantly view the complete service catalog. The interface is designed to be simple and clear, eliminating confusion during the booking process.

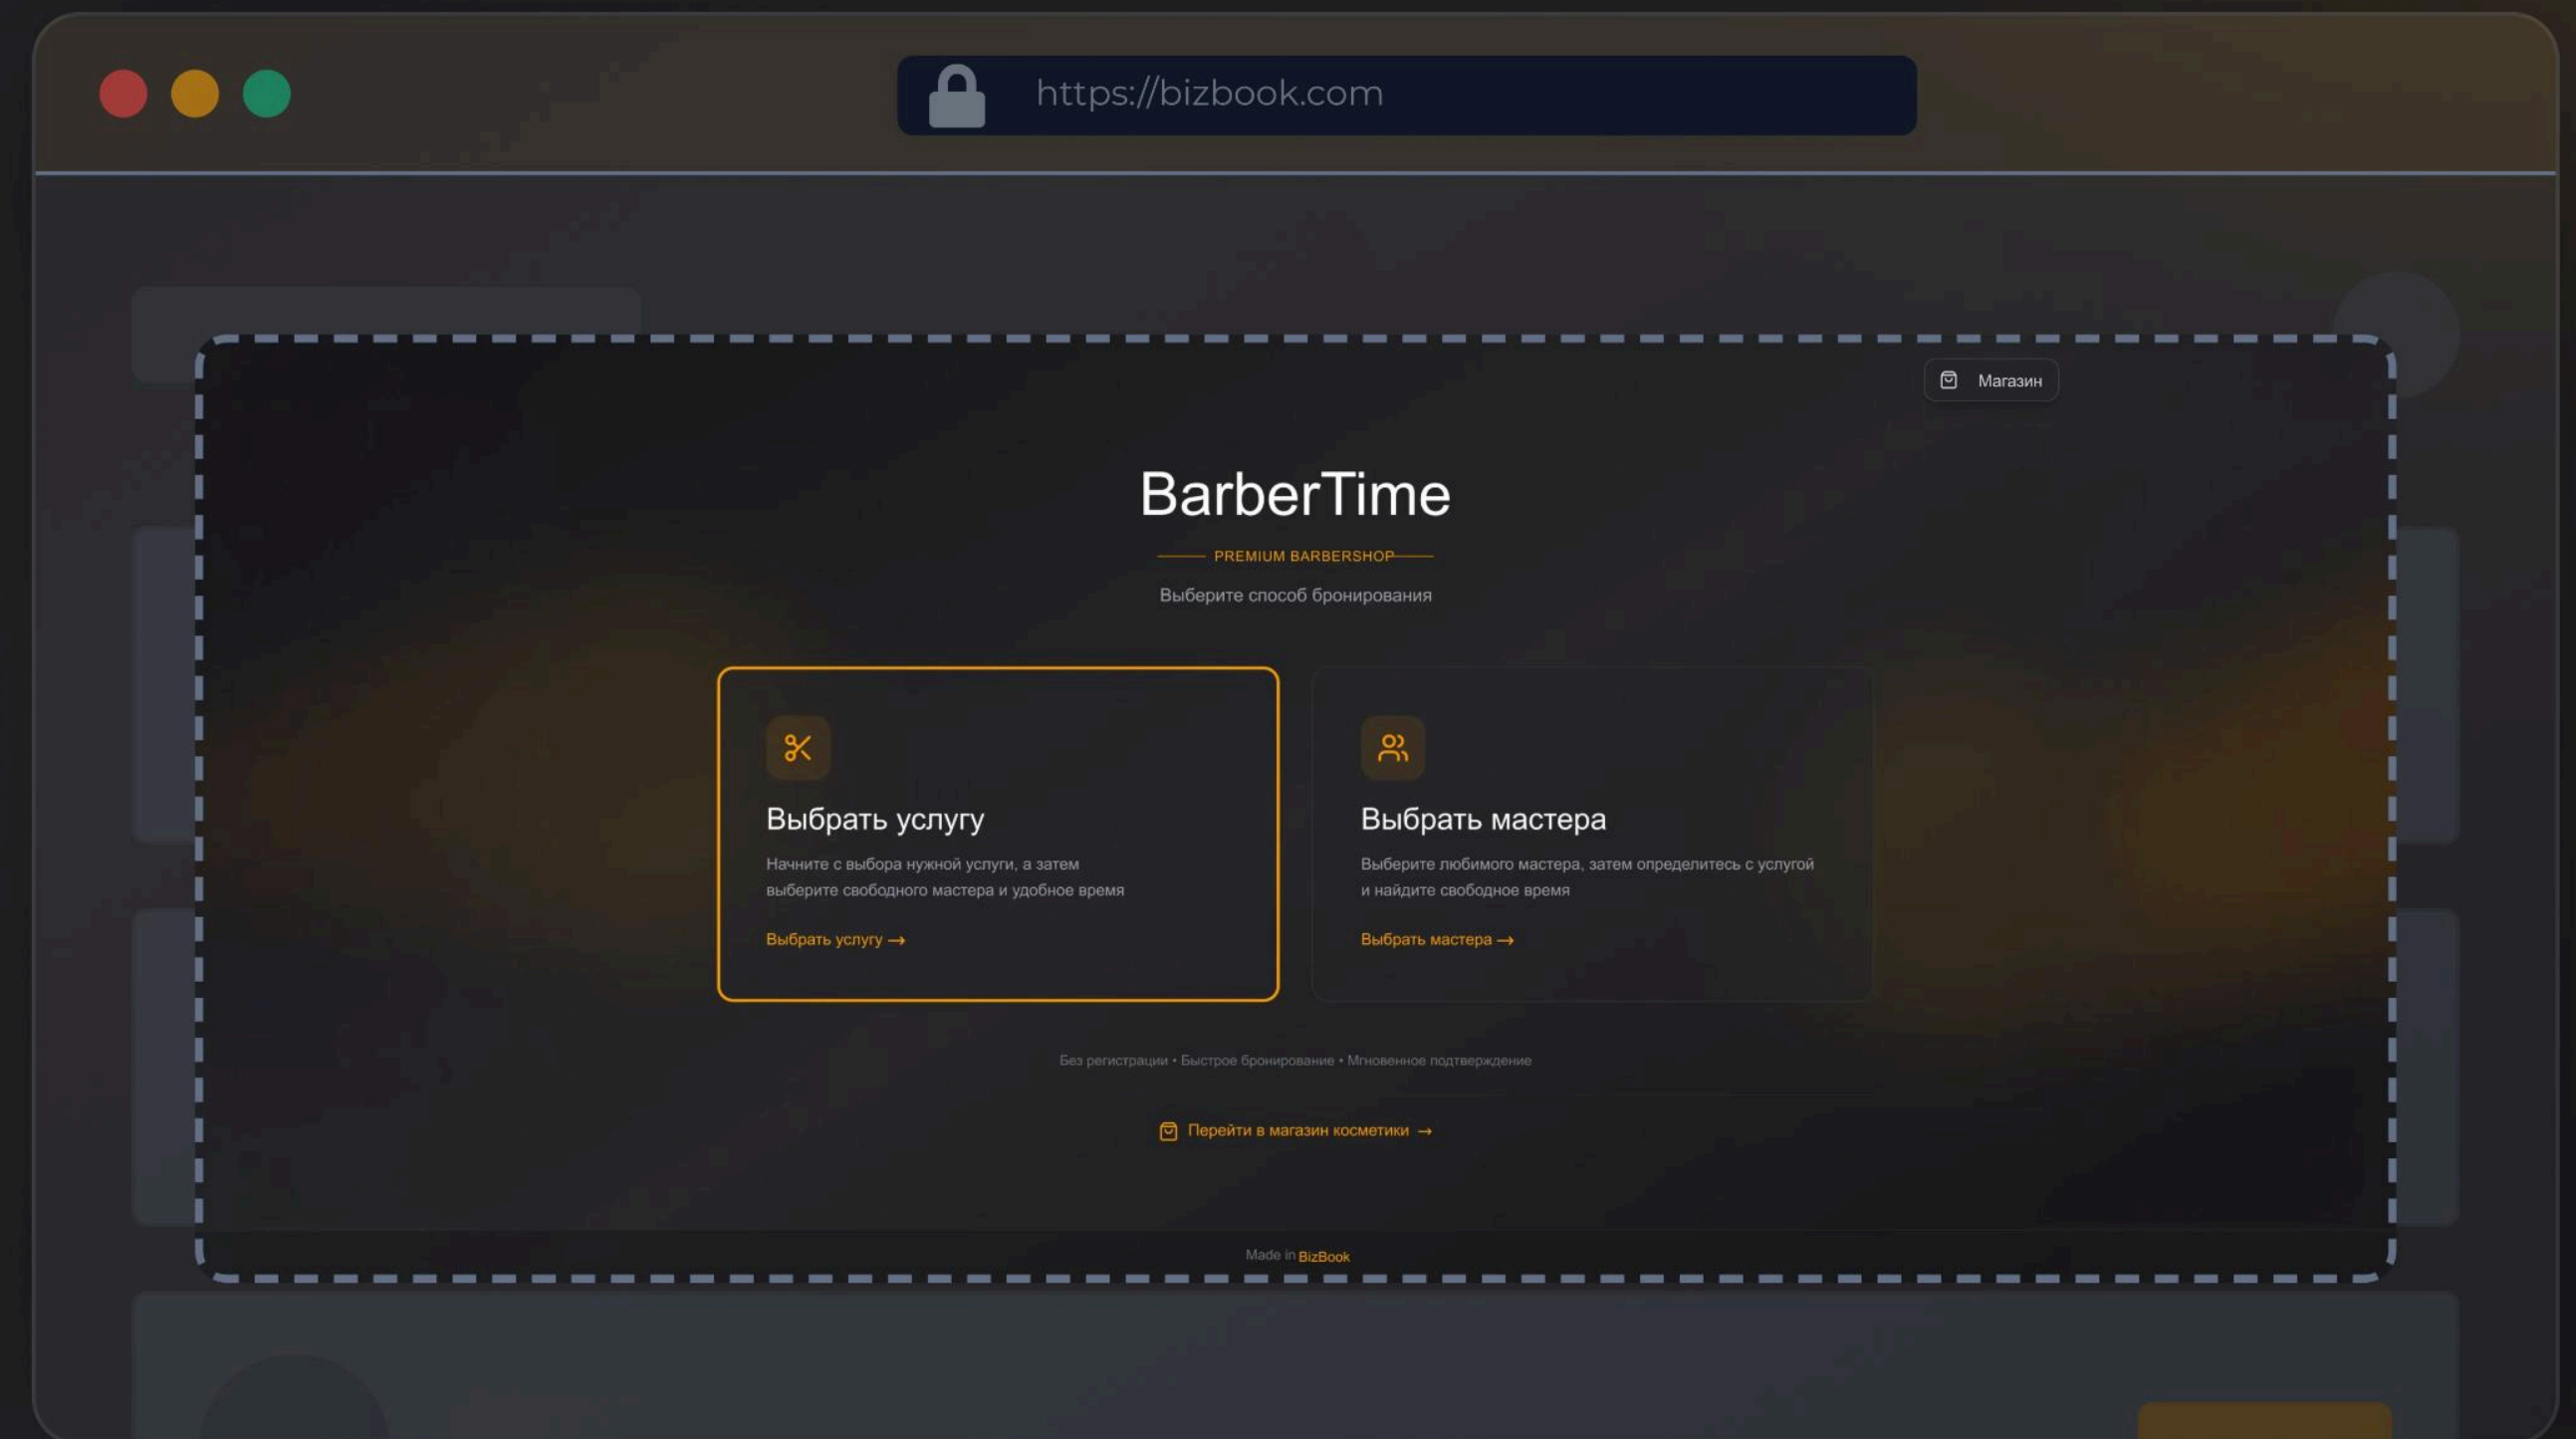

Transparent Pricing

Clear costs for every service

Duration Estimates

Know exactly how long it takes

Choose Your Master

Clients aren't just booking a haircut; they are choosing an experience. The system allows selection of specific barbers based on profiles, ratings, and expertise.

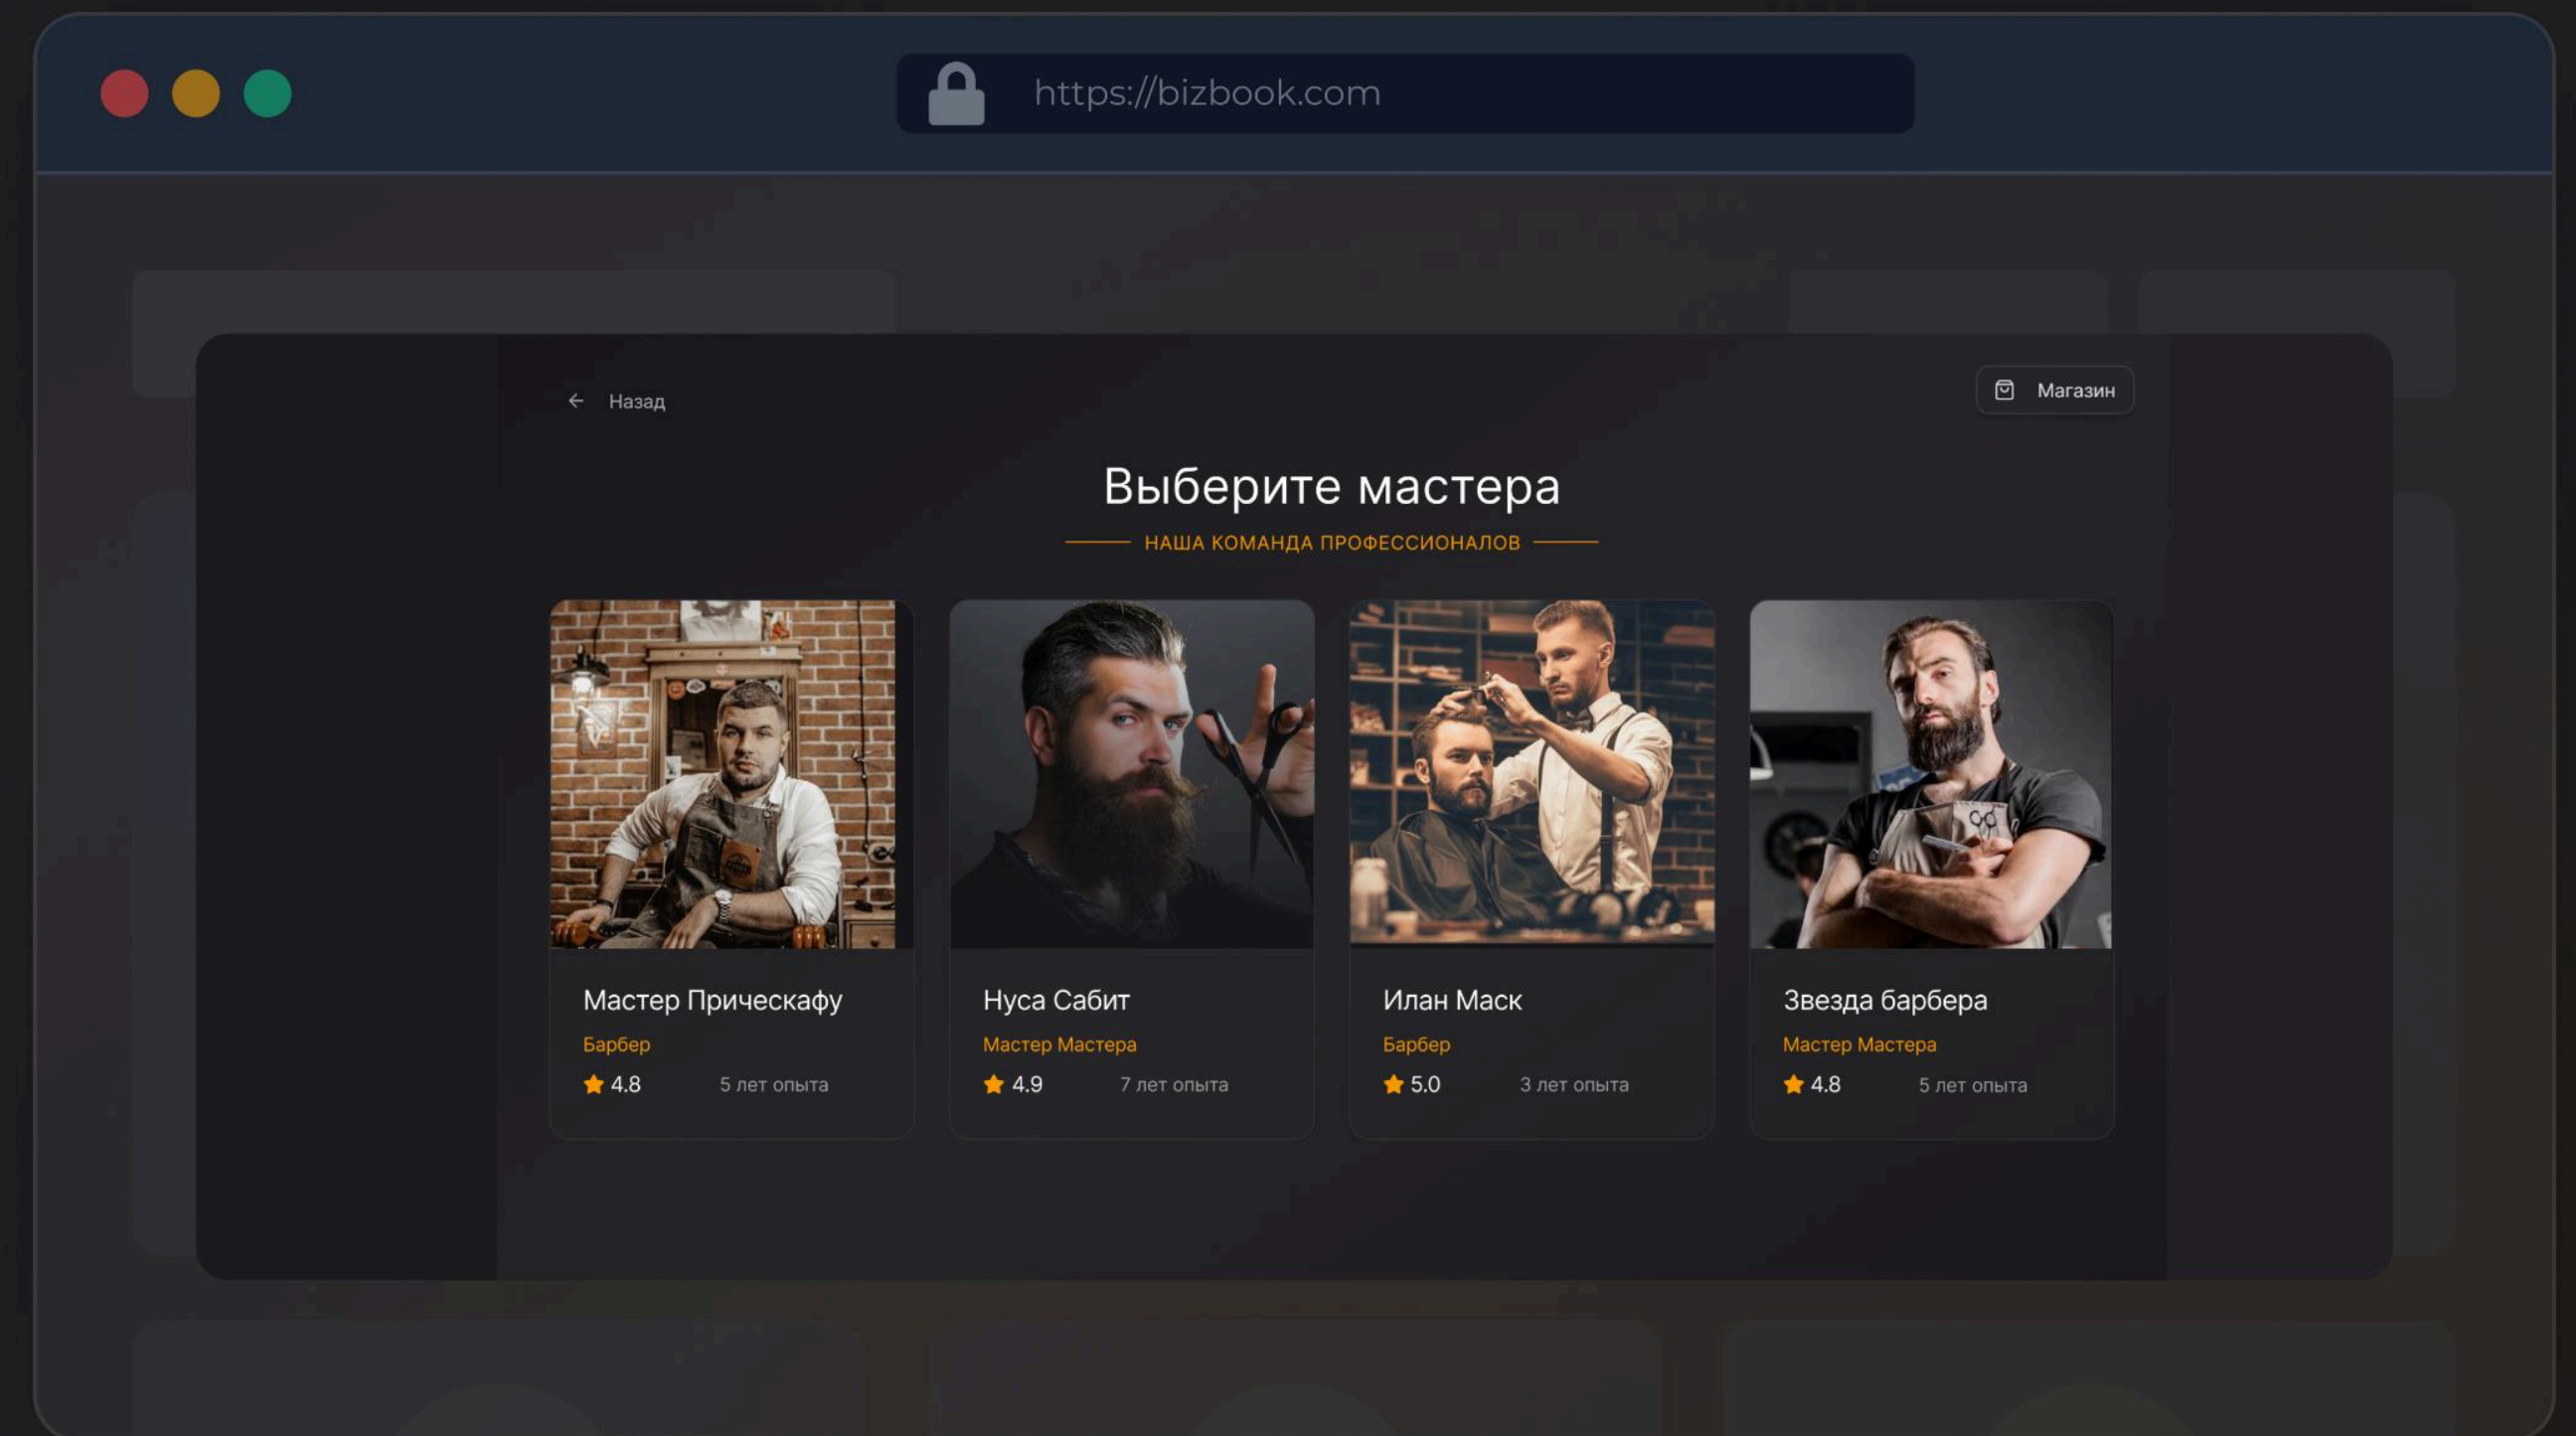

Ratings & Reviews

Transparent feedback history

Full Profiles

Experience, status, and portfolio

Date & Time Selection

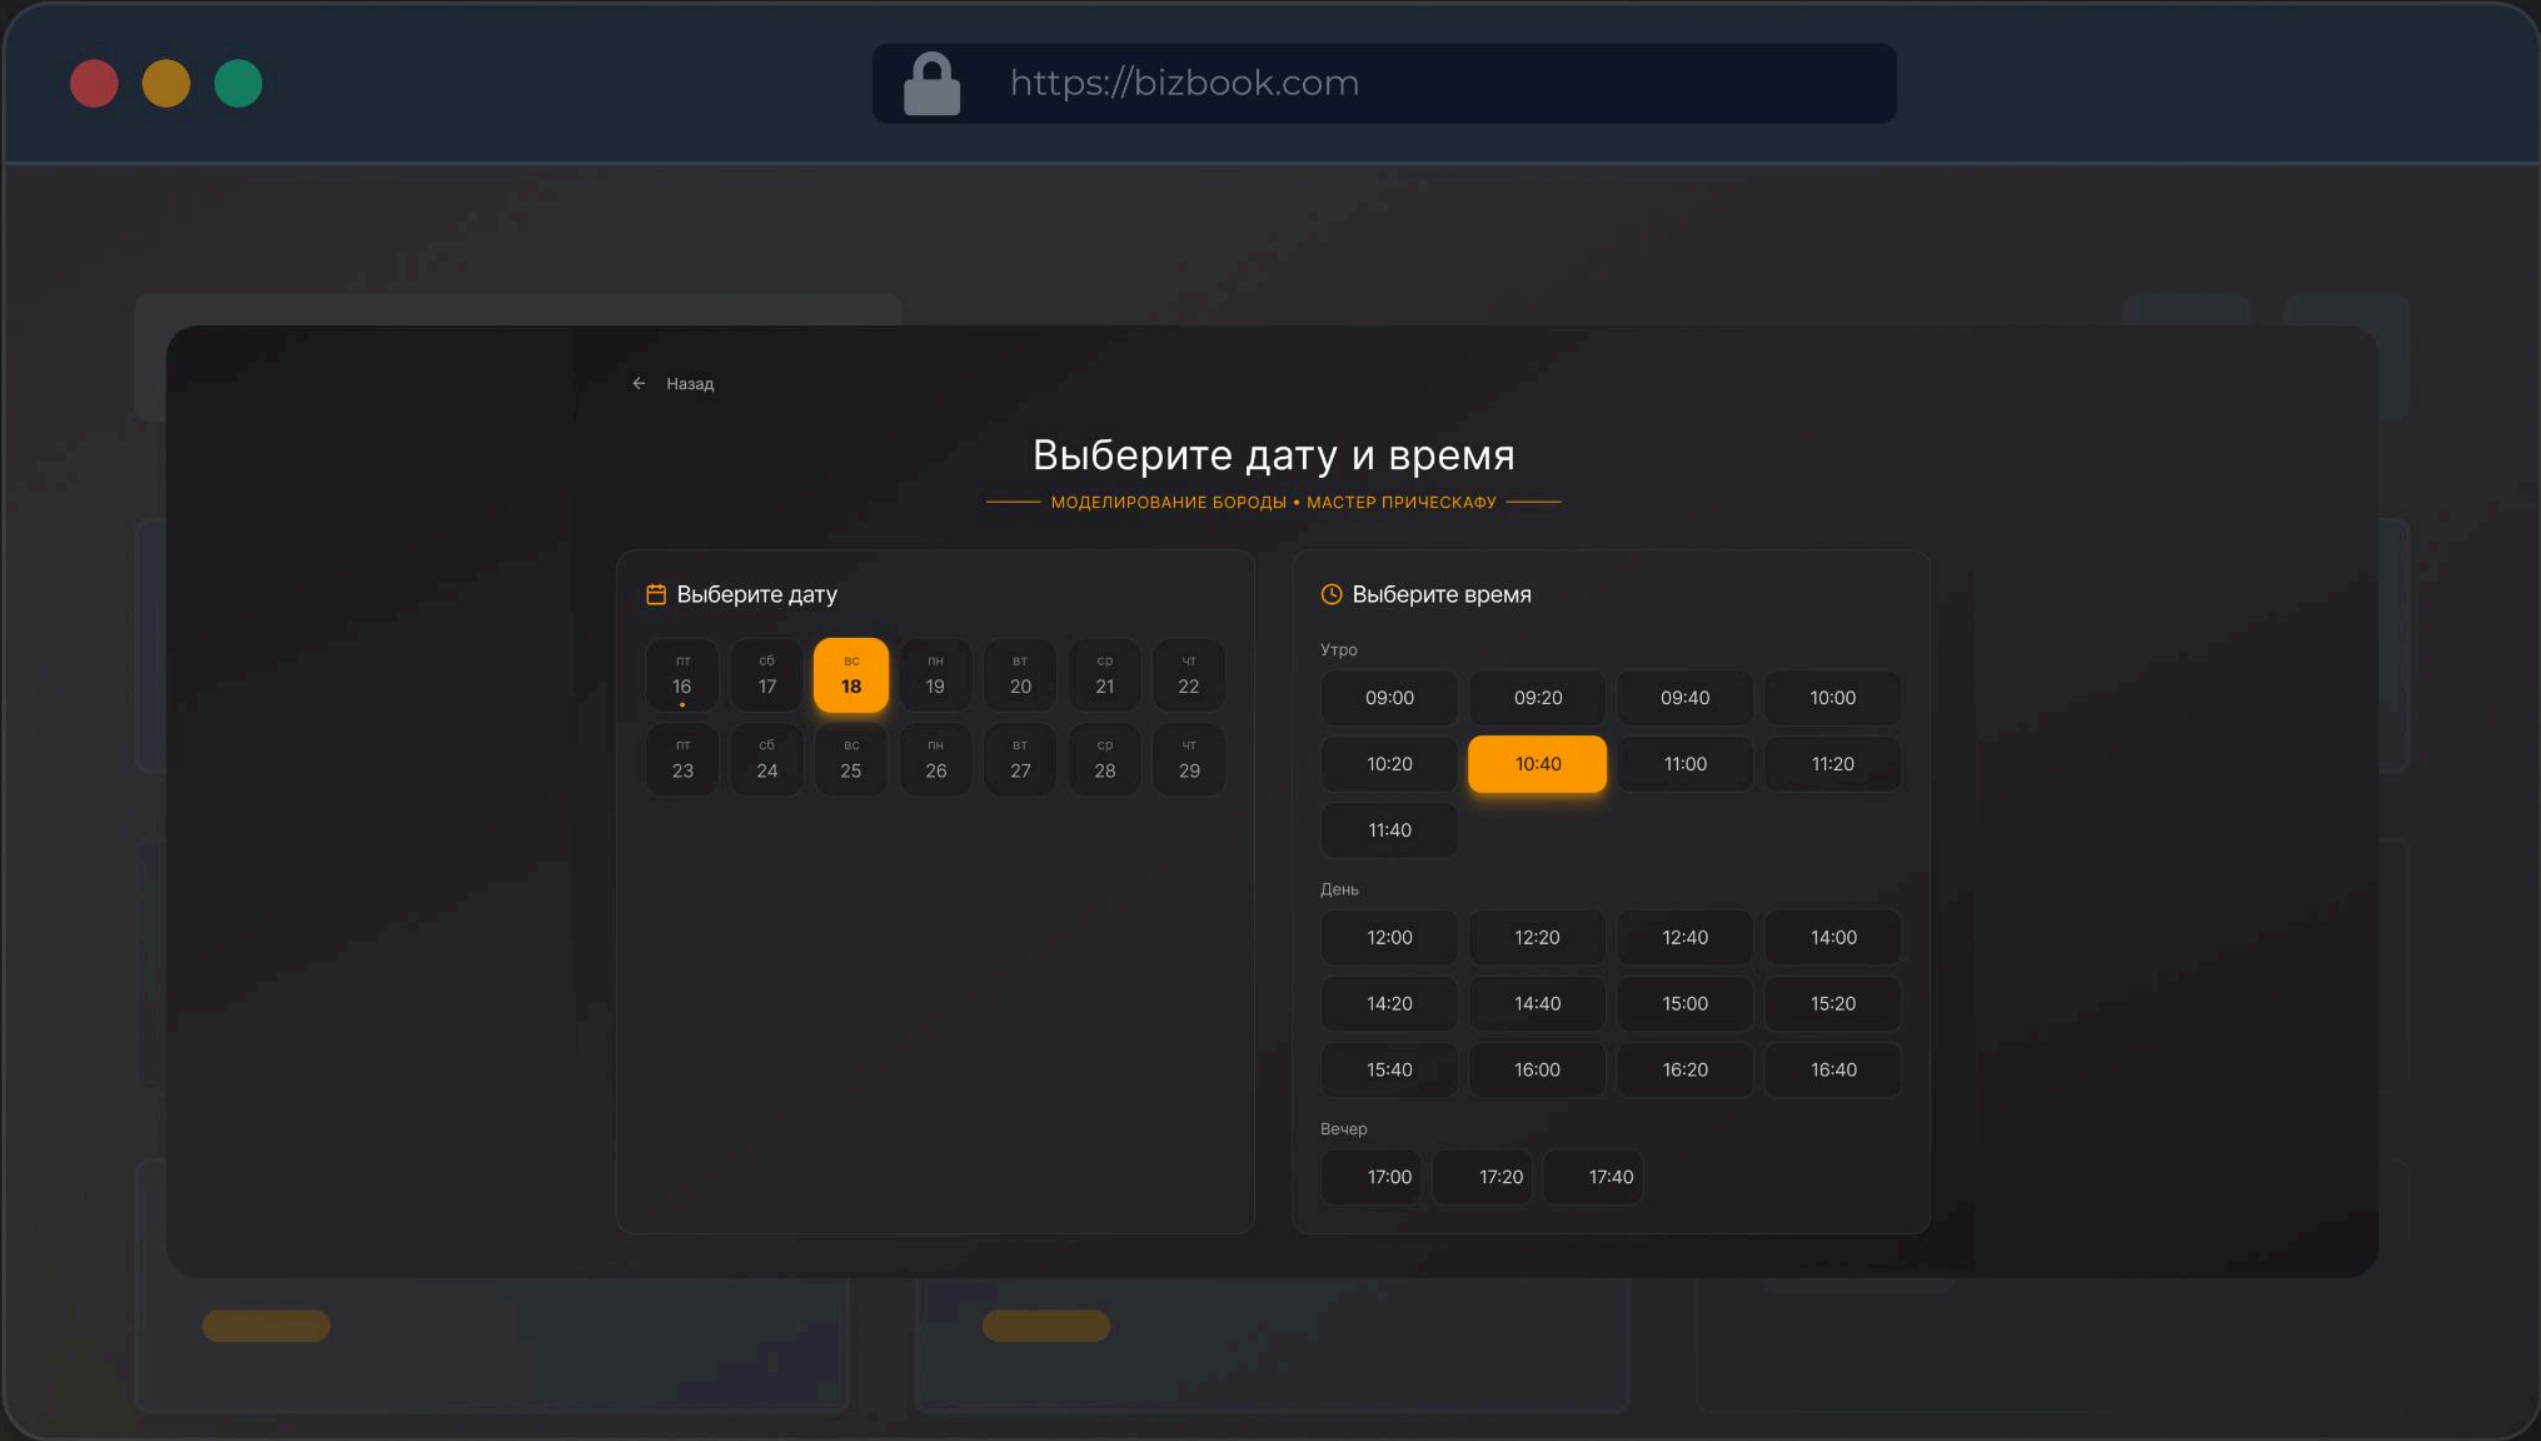

The intelligent scheduling system shows real-time availability. Unavailable slots are automatically blocked to prevent double-bookings and ensure a smooth schedule.

Real-time Availability
Instant updates on free slots

Auto-Blocking
Prevents scheduling conflicts

Booking Confirmation

To finalize the appointment, clients simply enter their name and phone number. The system instantly processes the request, securing the slot and notifying the admin.

Simple Input

Name and phone number only

Instant Request

Immediate submission to system

The screenshot shows a web browser window with the URL <https://bizbook.com>. The page displays a booking confirmation form titled "Контактные данные" (Contact Information) with a subtitle "последний шаг" (last step). The form includes the following fields:

- Selected service: "Моделирование бороды" (Beard styling)
- Appointment date and time: "вторник, 20 января 2026 г. в 10:30" (Tuesday, 20 January 2026 at 10:30)
- Name field: "Ваше имя *" (Your name) with the value "Нускайым Сабиталиева" (Nuskayim Sabitalieva)
- Phone field: "Телефон *" (Phone) with the value "+996(900)-XX-XX-XX"
- Optional comment field: "Комментарий (необязательно)" (Comment) with the placeholder "Дополнительные пожелания или информация" (Additional wishes or information)
- A yellow "Отправить заявку" (Send request) button at the bottom.

Admin Panel

Admins manage the entire barbershop from one centralized dashboard. The system is designed to be intuitive, ensuring that no technical knowledge is required to operate it effectively.

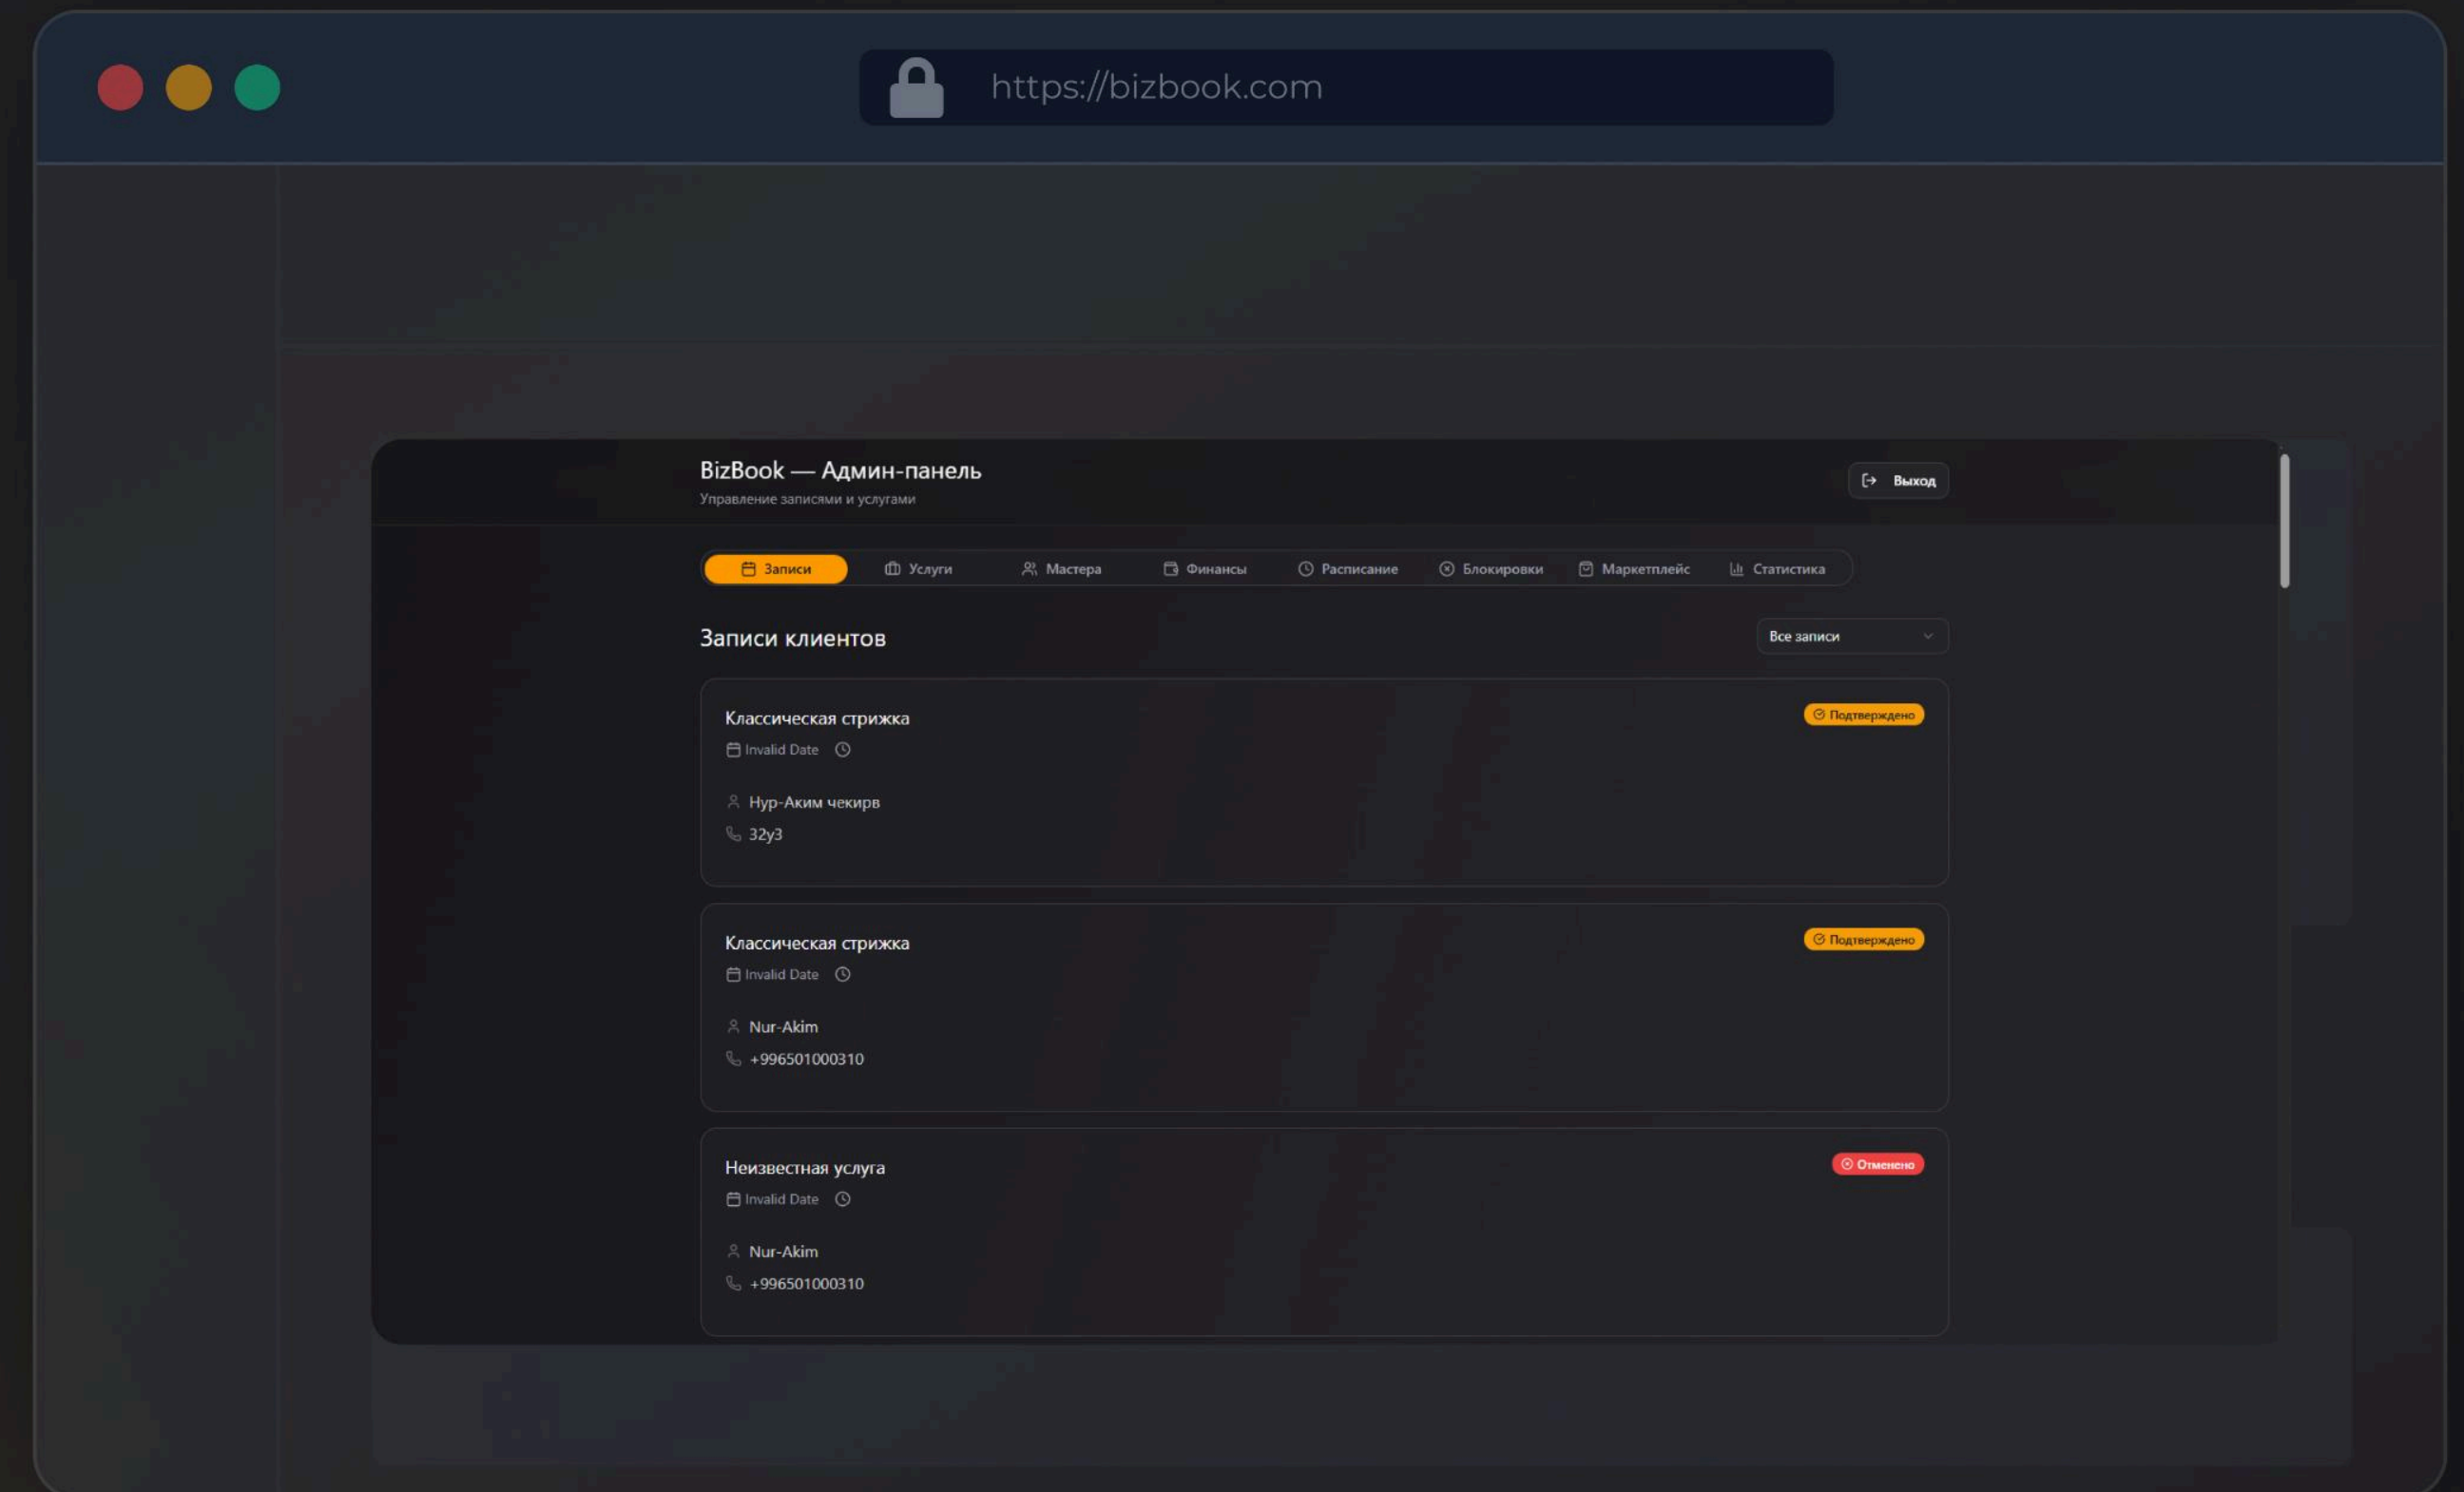

Centralized Control

Manage entire business from one view

No-Code Management

Simple interface for non-tech users

Admin Panel Features

Comprehensive control over every aspect of the barbershop business from a single, intuitive dashboard.

Manage Bookings

View, approve, reschedule, or cancel appointments instantly. Real-time updates prevent conflicts.

Manage Services

Add new cuts or treatments, adjust pricing, update durations, and organize service categories.

Manage Barbers

Create staff profiles, assign specialties, track performance ratings, and manage access levels.

Work Schedule

Configure shift timings, set days off, and block specific dates for holidays or maintenance.

Marketplace

Manage inventory for cosmetic products, track sales orders, and update product listings.

Statistics & Analytics

Visualize total bookings, revenue growth, cancellation rates, and most popular services.

Cosmetics Marketplace

The system includes a fully integrated marketplace. Clients can browse and purchase premium hair care and beard products recommended by their barbers directly within the app.

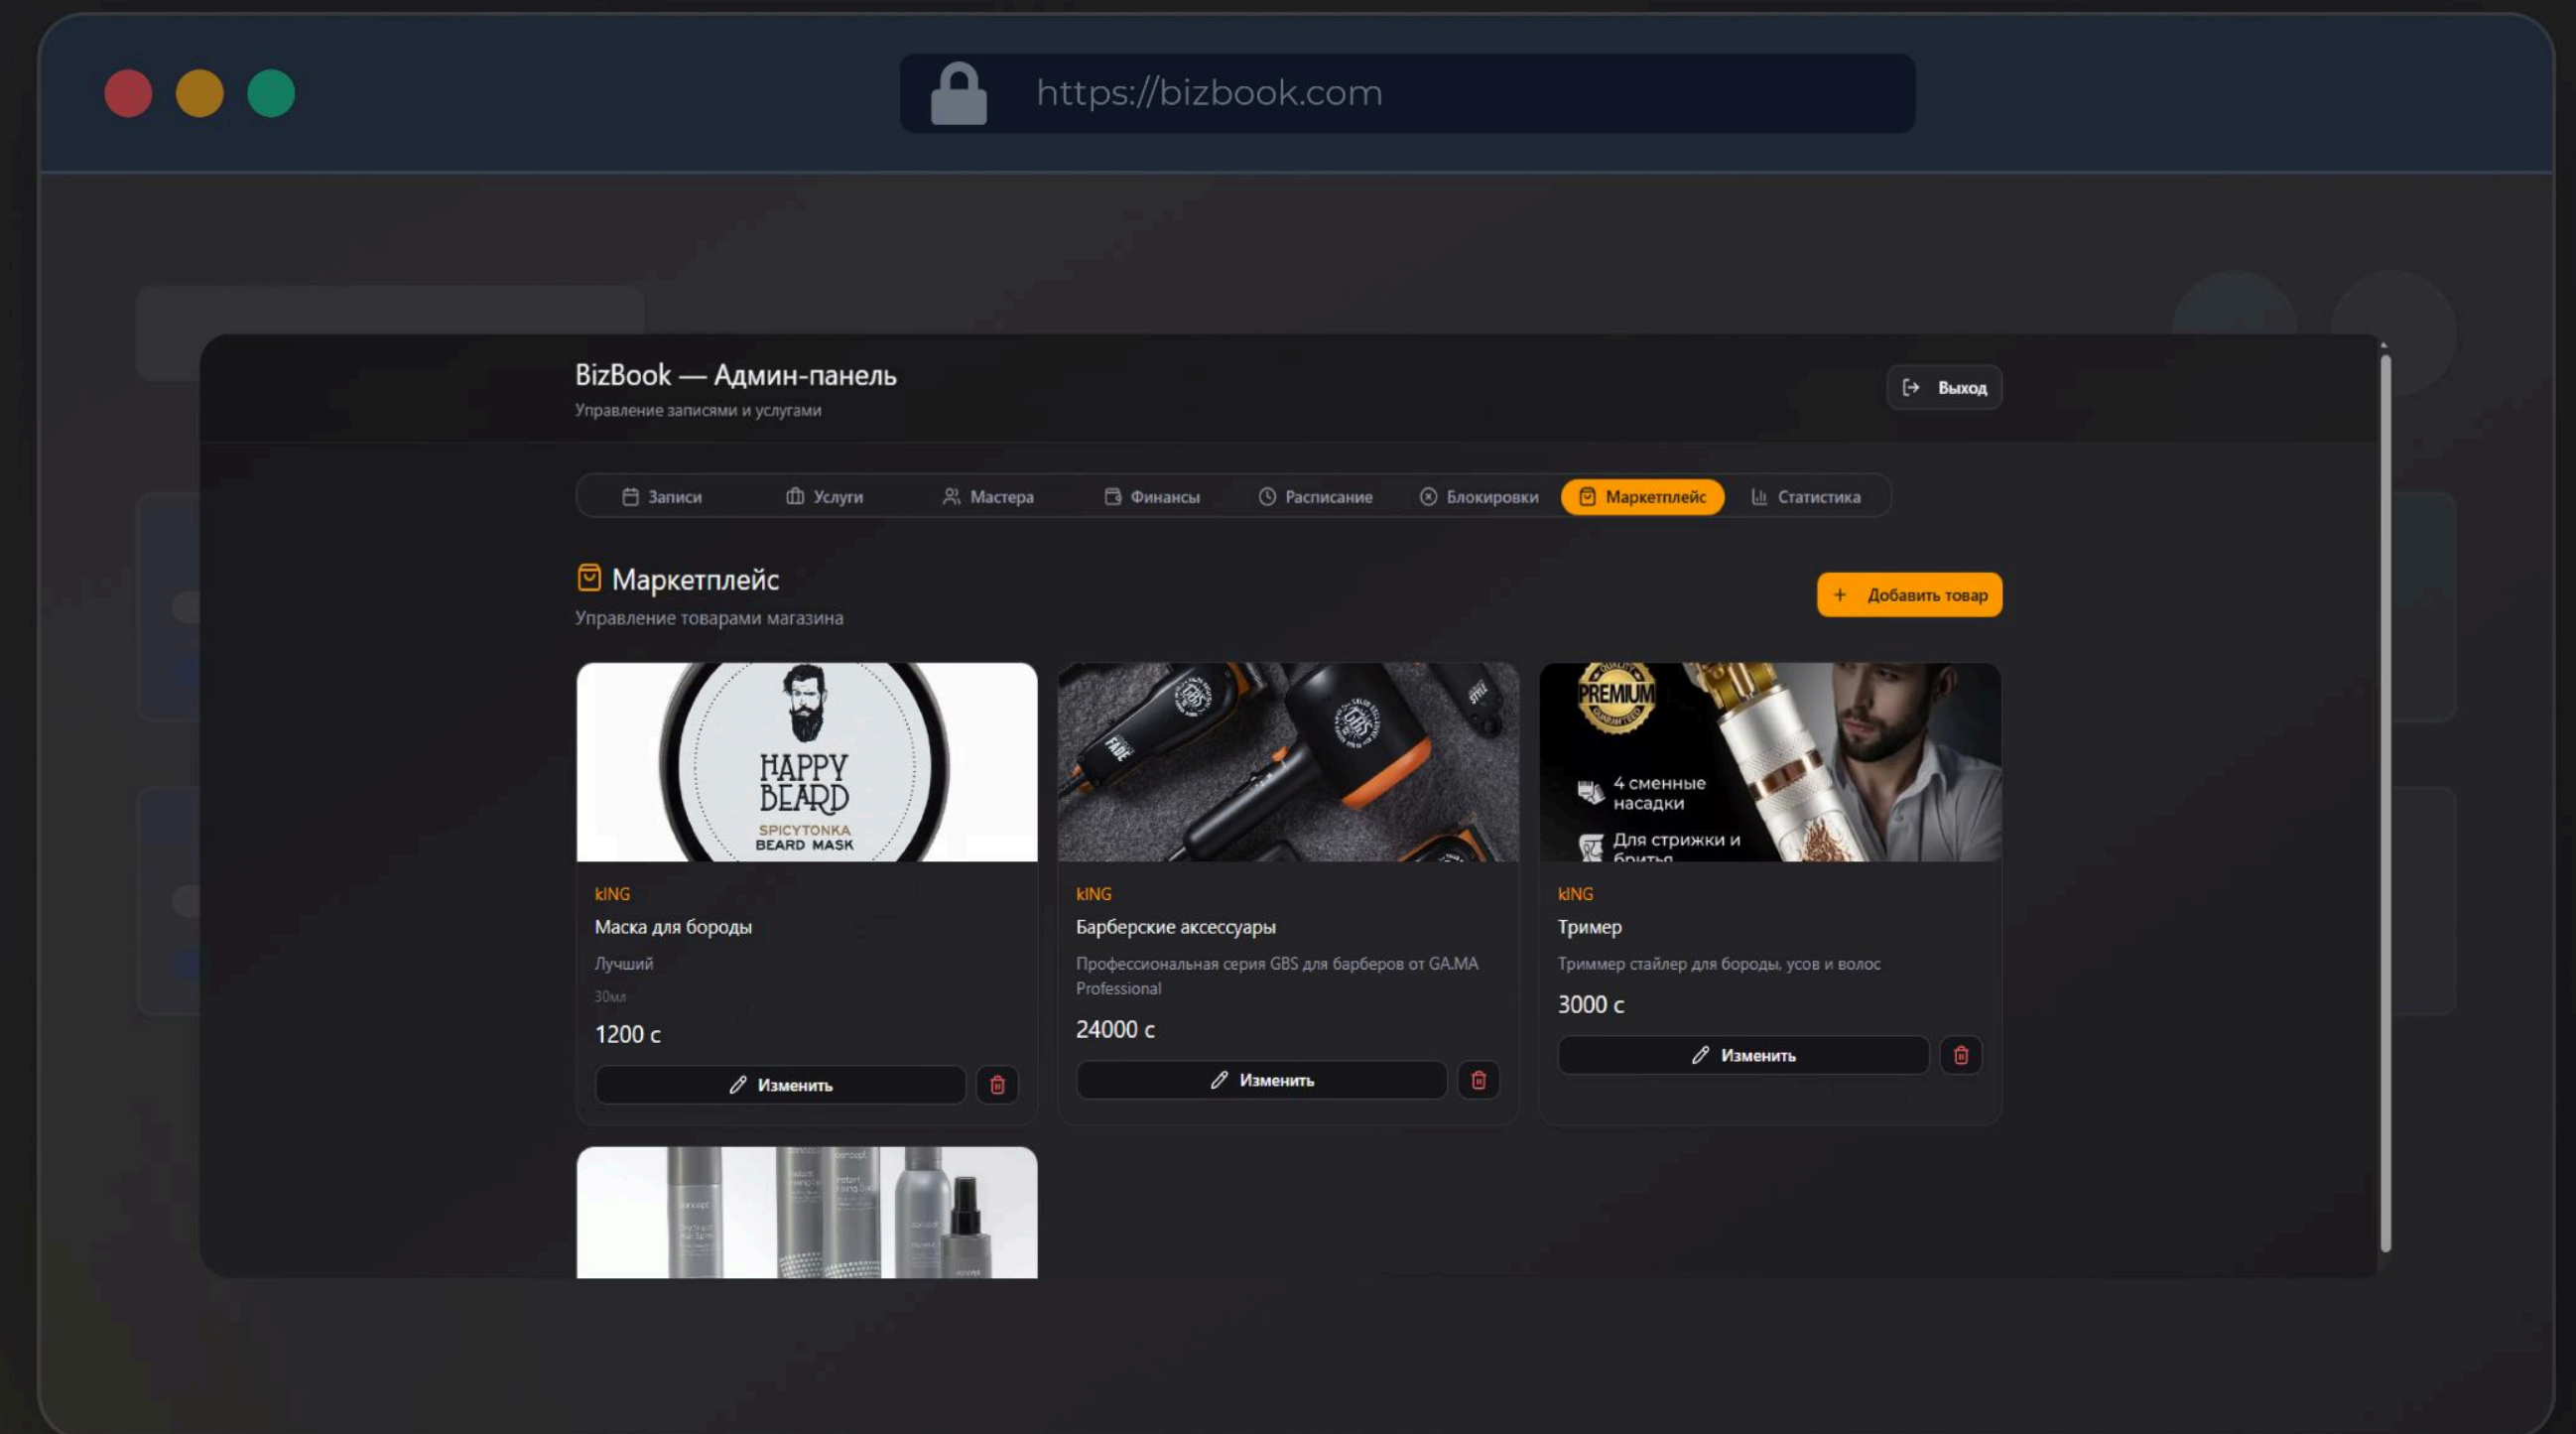

Product Catalog

Visual browsing with detailed info

Seamless Purchase

Add products to service bookings

Statistics & Analytics

The admin panel shows total bookings, confirmed, canceled, and pending bookings. This helps barbershop owners analyze business performance and optimize schedules.

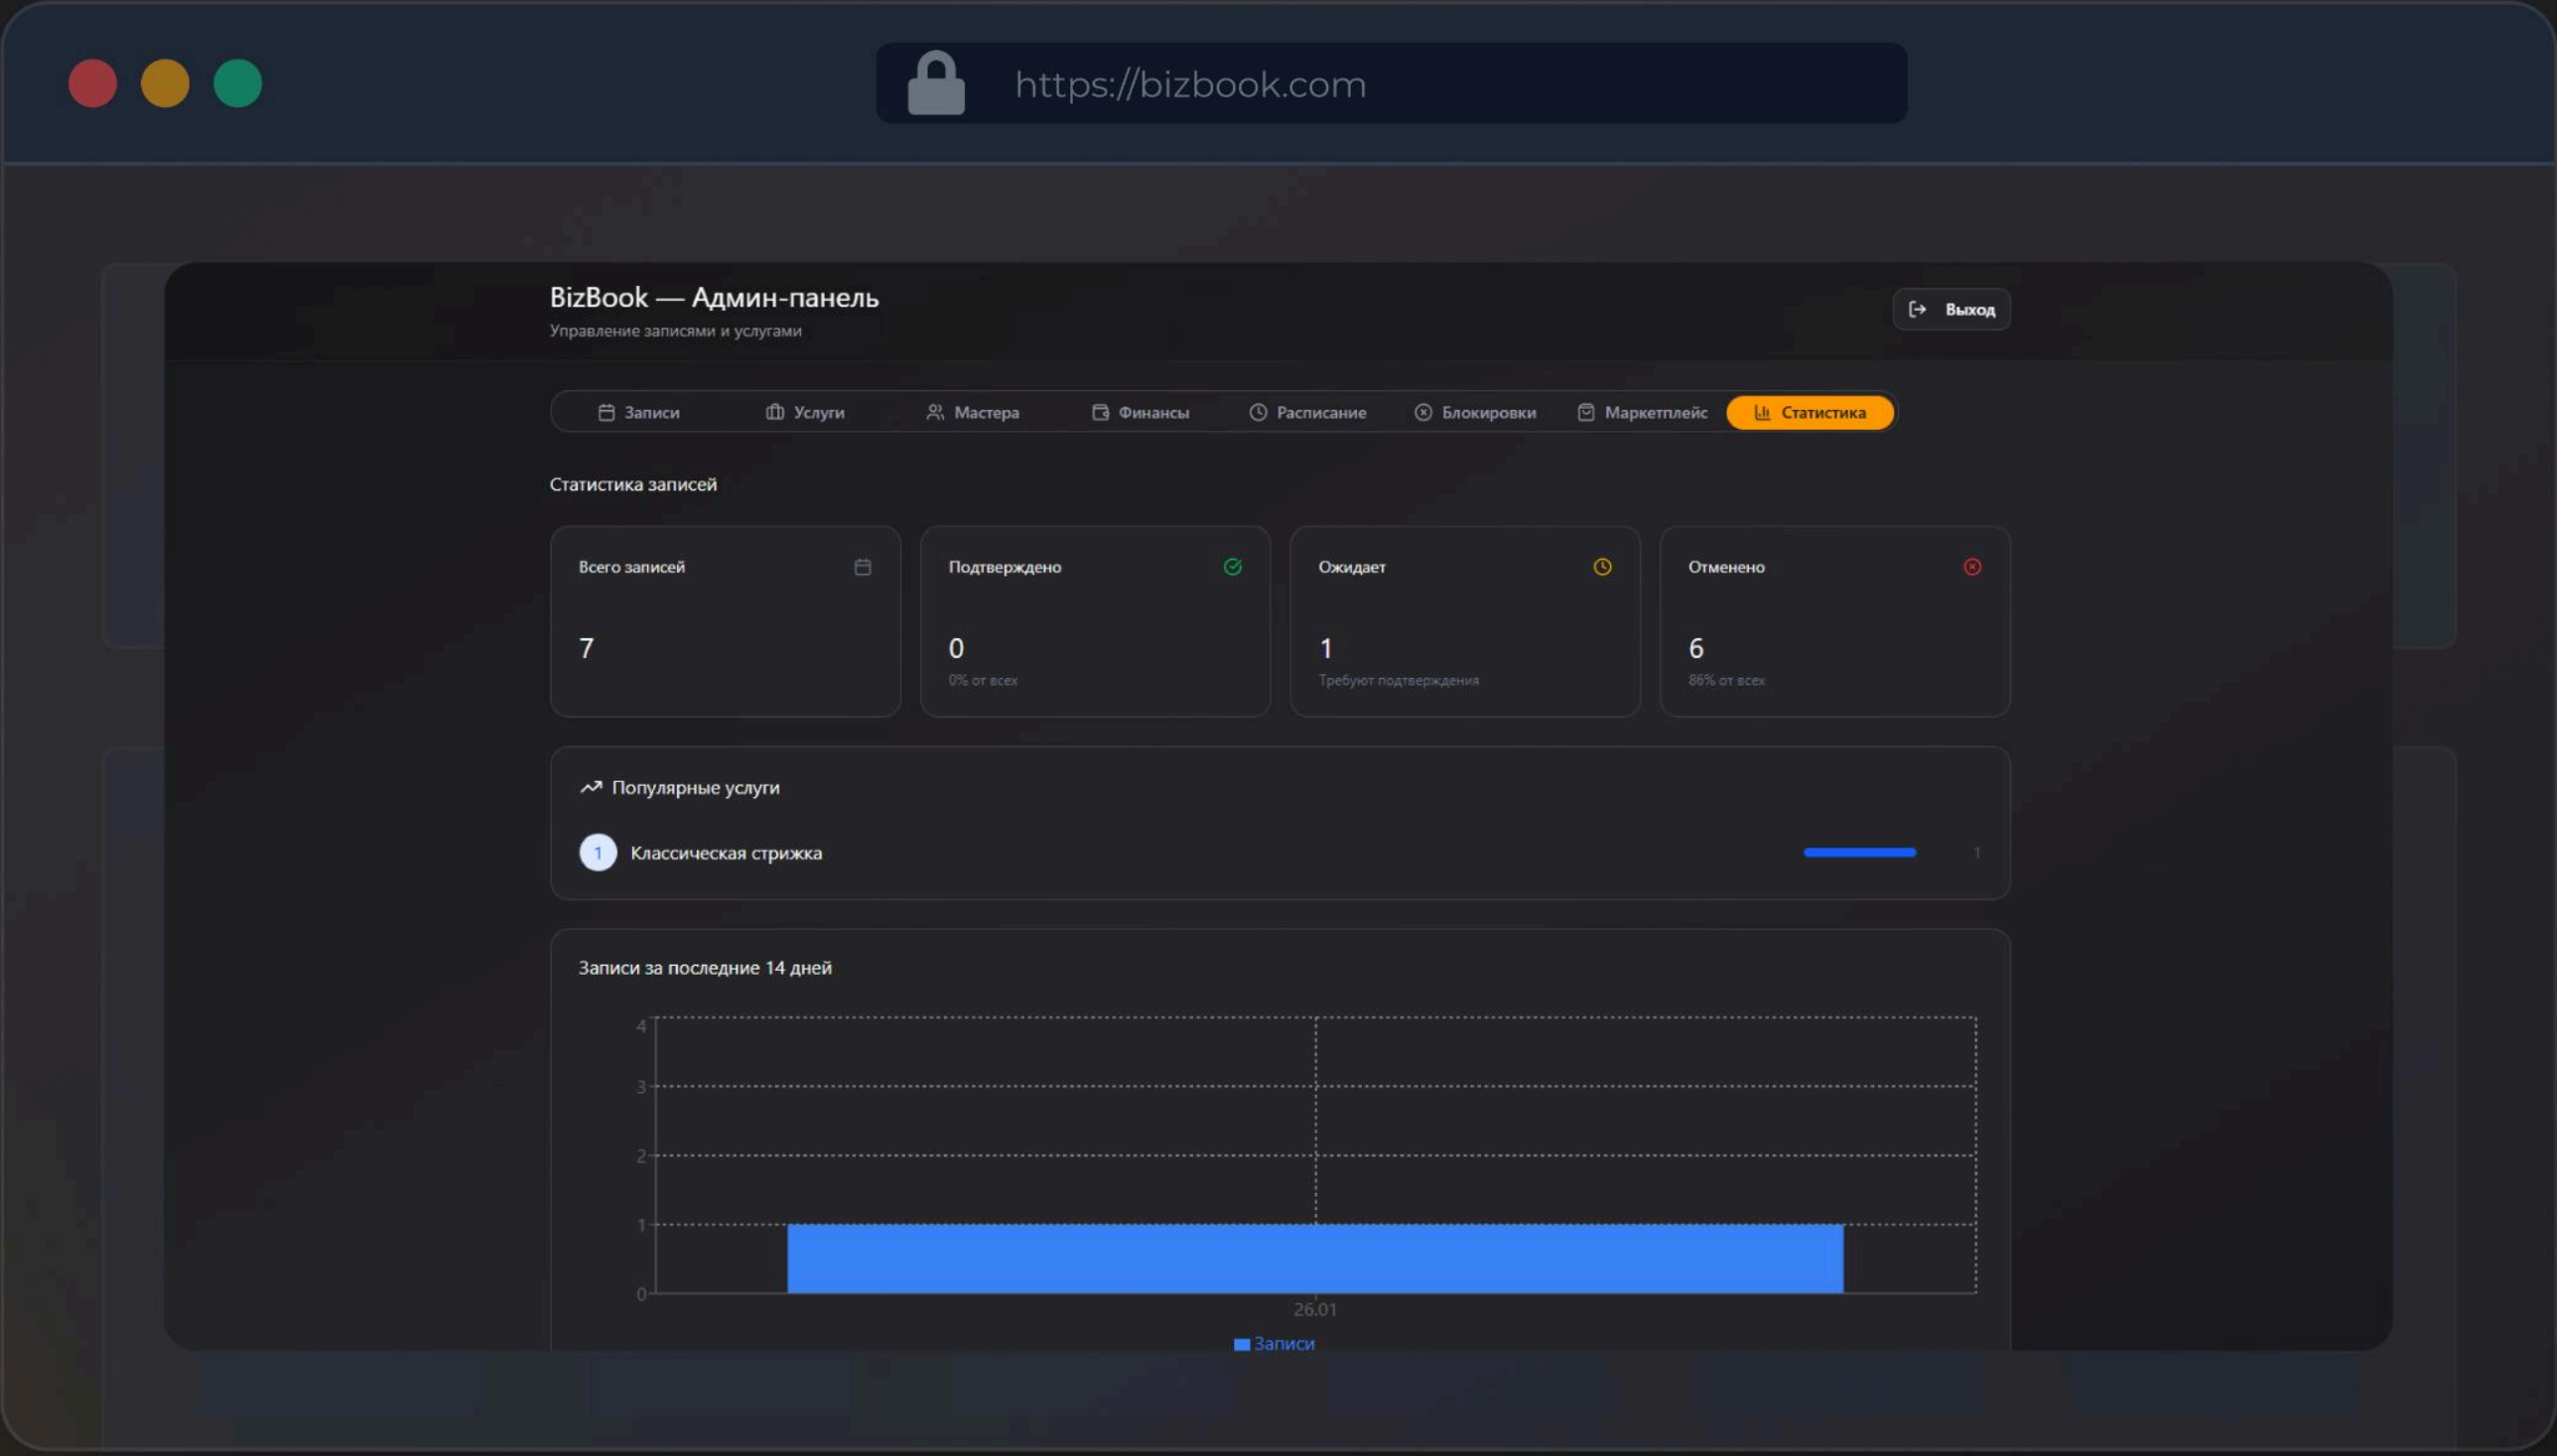

Booking Overview

Visual breakdown of status types

Performance Metrics

Track total requests and cancellations

Conclusion

BizBook successfully transforms the booking experience, creating a seamless bridge between modern clients and professional barbers.

Saves Time

Automates scheduling tasks, freeing up valuable time for barbers to focus on their craft.

Reduces Errors

Eliminates double-bookings and lost appointments common with manual tracking methods.

Modernizes Business

Provides data-driven insights and digital tools that elevate barbershop management.

This project demonstrates how digital solutions can solve real business problems.
